

HYDROMAX USA

Advanced Water and Wastewater Data Collection

LARGE DIAMETER PIPE INSPECTION

Simultaneous Laser • Sonar • HD Imaging

Our data presentation allows the user to rapidly understand potential issues with corrosion, sedimentation and structural defects.

- Sewers >30 inches in diameter
- Bypass pumping is not needed
- Capable of performing continuous inspections for more than a mile
- Reports provided 30 to 40 days after field work completed
- Laser data collected 12x per second
- Sonar readings taken 1x per second
- HD Images captured 6x per second
- Cross sections and images every 50 feet and at problem areas

understanding the present | **to protect the future**
