Pre-Locates  
Legacy  
Verification

## Water Distribution

Meter Accuracy Testing  
C-Factor Testing  
Leak Detection  
Meter Sizing  
Hydro Scouring  
Water Audit  
Valve Exercising  
and more...

## Our Clients' Thoughts

---

"Hydromax USA has installed, maintained, and provided data for 500+ flow meters for me in the Southeast and Midwest over the last four+ years. Their personnel have excelled in meeting project needs... from selecting meter locations, installations, maintenance, and submittal of the final data. Equally as important they do a great job of communicating throughout the project."

**Shannon Campbell, P.E.**  
Project Manager, CDM

"I've worked with Hydromax USA on numerous sewer evaluation projects. I have always appreciated their commitment to deliver both quality service and great deliverables. Hydromax USA really understands the technical challenges associated with obtaining good data and the significance of the data to the engineer and owner."

**Jason Petersen, P.E.**  
Manager, Florence & Hutcheson, Inc.

"If it was my choice, I would definitely go with Hydromax USA. By far they deliver the highest quality product, have the most conscientious and reliable crews, and provide the best customer service of any CCTV contractor we've dealt with"

**Paul Batman**  
Project Manager, Malcolm Pirnie
